

Serial No. 10/086,206

Docket No.: <u>408.014-CON</u>

IN THE SPECIFICATION:

Following the last page of the specification as originally filed, please replace the Sequence Listing with the accompanying Substitute Sequence Listing.

Please amend the specification as follows:

	On page 14, please replace (or rewrite) line 12 with the following:
·B(Figure 2: Nucleotide sequence (SEQ ID NO:12) of the senX3 and -
	On page 14, please replace (or rewrite) line 14 with the following:
	sequences: nucleotides 3 to 119 is the open reading frame (ORF) for PgmY
	amino acid sequence (SEQ ID NO:19); nucleotides 296 to 1528 is the ORF for
	the SenX3 amino acid sequence (SEQ ID NO:20); and nucleotides 1679 to 2362
32	is the ORF for the RegX3 amino acid sequence (SEQ ID NO:21). The arrows
-	indicate palindromic sequences. \-
	On page 14, please replace (or rewrite) line 34 with the following:
	region between the BCG (IPP) (nucleotides 1516-1689 of SEQ ID NO:12) and
B3	M. tuberculosis (IPL) (SEQ ID NO:13)
	On page 14, please replace (or rewrite) line 37 with the following:
	inferred protein sequences. The intercistronic region of BCG contains two
	open reading frames (ORFs): (1) nucleotides 1525-1602 of SEQ ID NO:12
_	is the ORF for SEQ ID NO:14 and (2) nucleotides 1602-1679 of SEQ ID NO:12
71/	is the ORF for SEQ ID NO:15. The intercistronic region of Mycobacterium
134	tuberculosis contains three ORFs: (1) nucleotides 10-87 of SEQ ID NO:13 is the
•	ORF for SEQ ID NO:16, (2) nucleotides 87-164 of SEQ ID NO:13 is the ORF
	for SEQ ID NO:17, and (3) nucleotides 164-217 of SEQ ID NO:13 is the ORF
	for SEQ ID NO:18.
